

INFORMACIÓN DE INTERÉS PARA SU BIOTABLET

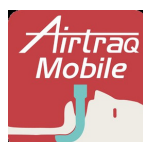

1- PATIENT BLEEDING VOLUME

- Aplicación que estima, en función de los datos antropométricos del paciente, los valores hematimétricos de las analíticas, y la fluido/hemoterapia empleada, el volumen de sangre perdida por el paciente durante la cirugía.
- Realizada por los desarrolladores de Capstesia, en proceso de validación clínica.

2- AIRTRAQ MOBILE

- Conecta el cabezal de cámara al dispositivo Airtraq, y une su cable a la Biotablet, de tal modo que podrás utilizar su pantalla para las intubaciones: graba videos, toma fotos, usa el zoom...

3- DAS APP

- En esta App podrás encontrar las guías de la DAS (Difficult Airway Society) para la intubación difícil, algoritmos de extubación, manejo de la vía aérea pediátrica, y la vía aérea en la embarazada.

4- NYSORA

- App de la New York School of Regional Anesthesia, donde se describe la realización de bloqueos periféricos ecoguiados para el miembro superior.

5- ANESTHESIA PROCEDURES

- Anesthesia Procedures is an app designed for anesthesiologists who would like to have a quick video handy to view before they do a procedure. Procedures from Peripheral Nerve Blocks, Airway Management, Central Lines, and Neuraxial Blocks.

LINKS INTERESANTES SOBRE FLUIDOTERAPIA , MONITORIZACIÓN HEMODINÁMICA O CUIDADOS PERIOPERATORIOS:

1- INTERNATIONAL FLUID ACADEMY (IFA):

- The initial IFAD founders are Dr Manu Malbrain, internist-intensivist and ICU director at the ZNA Stuivenberg hospital and Dr Niels Van Regenmortel, internist-intensivist, ICU staff member at the ZNA Stuivenberg hospital. Founded in 2011 during the 1st International Fluid Academy Day (iFAD) meeting the goals of the IFA are to foster education and promote research on fluid management and monitoring in critically ill patients, and thereby improve the survival of critically ill patients by bringing together physicians, nurses, and others from a variety of clinical disciplines.

2- FLUID PHYSIOLOGY

- This website is for physicians and physiologists who want resources and support to learn, to apply and to teach the steady-state Starling principle. They also welcome contributions from the Pharmaceutical Industry and Equipment Manufacturers engaged in the field of fluid physiology and fluid therapy. It is directed and moderated by Tom Woodcock M.Biol. Ph.D and Thomas Woodcock MB.BS M.Phil Med Law (Glasg).

3- ERAS SOCIETY

- ERAS® stands for Enhanced Recovery After Surgery and is used for a process of perioperative care. The ERAS® Society is a non for profit medical society active in all parts of the world. The ERAS® Society has gathered world expertize to produce, publish and update Guidelines for evidence based perioperative care for a growing number of surgeries in different surgical disciplines. These Guidelines forms the basis for training programs helping units worldwide to implement the ERAS® Society guidelines, the ERAS® Implementation Programs. As part of these programs an interactive IT system is used, the ERAS® Interactive Audit System.
