

# WEBINAR: HOW TO GET THE FULL POTENTIAL OF CANON OCT ANGIOGRAPHY

**March 22<sup>nd</sup> 2018, 17:00 ~ 17:40 (CET)**

By Dr. Sal Rassam, MD DO FRCOphth

## The speaker

Dr. Sal Rassam is a Consultant Ophthalmic Surgeon at Panacea Medical Centre, United Kingdom, specialising in disease of the retina and vitreoretinal surgery. He has over 30 years of experience for diabetic patients, retinal vascular disease, disease of the macula and other vitreo-retinal conditions.

He has an extensive experience with the Canon OCT-HS100 and OCT Angiography.

## Aim

The aim of the webinar is to have an interactive presentation of the Canon OCT-A technology and its ability to meet various clinical settings.

## Target Audience

The audience we target for the webinar is

- Owners of Canon OCT-HS100 with Angio Expert who perhaps would like to know more of the clinical applications and the extensive possibilities of the software
- Owners of OCT-HS100 that consider an upgrade to OCT-A and want to understand the added value of software module.

## Content:

Introduction on the technology behind OCT and OCT Angiography. This will be followed up by a step-by-step presentation on the Canon OCT-HS100:

- Step 1 will be the initial default settings and the ability to modify these settings to suit different patients and disease process. Examples of clinical cases in relation to this will be presented.
- Step 2 will be image acquisition with examples of patients and disease processes.
- Step 3 will be image analysis with examples of clinical cases. Lastly some random interesting cases will be discussed.

The talk's duration will be approximately 30 minutes, additionally there will be chance for any further questions and answers.
