OCULFIT Orbital Implant

Brand name	OCULFIT							
References	6316-POI	6326-POI	6327-POI	8702-POI	6317-POI	8703-POI	6322-POI	8704-POI
Sphere diameter	14 mm	16 mm	18 mm	19 mm	20 mm	21 mm	22 mm	23 mm
Description and Indications	OCULFIT orbital implants are spherical implants designed to be implanted after an enucleation or evisceration of the eyeball. Manufactured using high density porous polyethylene, (HDPE) a material tested with excellent biocompatibility results. OCULFIT orbital implants have a smooth surface, which reduces the possibility of extruding the implant, four suture holes, to secure the device with ease, and a densely porous posterior surface, that facilitates integration and minimizes the risk of long-term exposure.							
Material	High density porous polyethylene.							
Sterilization method	Ethylene Oxide (ETO).							
Supply	Sterile, single container. The devices are accompanied by an insertion accessory that facilitates their implantation, avoiding the adhesion of the tissues in its path.							
Shelf-life	5 years							

PERFORATED CONFORMER

THE PERFORATED CONFORMER IS RECOMMENDED TO BE PLACED IMMEDIATELY AFTER THE SURGICAL PROCEDURE.

Brand name	AJL PERFORATED CONFORMER		
References	CF-S-AJL	CF-M-AJL	CF-L-AJL
Size	Small: 22 x 19 x 1.2 mm	Medium: 24 x 21 x 1.2 mm	Large: 25 x 22 x 1.2 mm

Brand name	ORBITAL VOLUMEN SIZER SET
Reference	AMB-A1-SET
Size	14 mm, 16 mm, 18 mm, 20 mm, 22 mm.

* Product with CE marking
