

B-Scan Plus®

Item #: 24-6100

The B-Scan Plus proprietary software combined with unique probe electronics make it the premier portable high definition B-Scan. While developing the B-Scan Plus software, Keeler visited many of the top facilities around the world. The results are a reliable and easy-to-use unit, which can quickly scan patients and transport information.

Features:

- 0.015mm image resolution is among the highest in the medical industry.
- Improved probe providing sharper, more focused images due to the elimination of signal loss.
- The unsurpassed data analysis contains 12 useful measuring calipers including: 6 lines, 2 areas, 2 angles, and 2 arrows.
- The "Smooth Zoom" technology allows for 2x full image zoom without distortion of real-time or captured scan.
- The portable probe can plug into any Windows™ based laptop or PC.
- Adjustable film loops that range from 2 seconds to 17 seconds.
- Unlimited adjustable and transferable video recording.
- Fully adjustable gain-control before, during or after scan.
- The Connect software allows the B-Scan Plus to integrate the option for A-scan and UBM modes for improved patient workflow.
- Easy to set up defaults, smooth customer interface and automatic EMR exports to decrease examination time, increase patient throughput, and increase profit.
- Unsurpassed compact file storage.
- Fully upgradable software.
- EMR compatible.
- DICOM™ ready.
- Multiple measuring velocities for ACD/VCD.
- PDF reporting.
- Archive data on a network or external location.

Accessories Included: Software installation, USB stick, probe holder, footswitch, wireless mouse, and ophthalmic gel
