

AJL Ophtalmic, S.A. It is a young and dynamic company that began its activity in July 1992. It is the sole Spanish company dedicated to design, manufacture and distribution of medical products in the field of ophthalmology.

Its activity is focussed on the innovation and development of new intraocular implants and other products with intraocular surgery application.

AJL has high quality standards with the main objective of ensuring the health and safety of patients.

In this regard, the manufacture of our products is supported by our highly qualified personnel, latest generation technology as well as, our extensive commercial network.

AJL has implemented an integrated quality management system according to ISO 13485 and ISO 14001.

All the products manufactured by AJL have obtained the CE mark, which ensures compliance with all the essential requirements established in Directive 93/42 / EEC on Medical Devices.

CORNEA

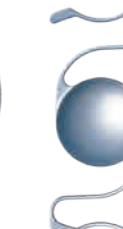

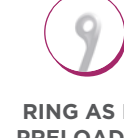

Comprehensive solution for Keratoconus treatment and surgery.

	ICRS	Surgical Instruments
	 Intacs® (optical area of 7 mm) Intacs SK® (optical area of 6 mm)	 Suitable for implantation of the corneal rings Intrastromal Intacs (Optical area of 7 mm BASE 800 µm y 6 mm BASE 800 µm)
	 AFR (optical area of 5 mm) AFR6 (optical area of 6 mm)	 Only suitable for implantation of FERRARA RING™ (Optical area of 5 mm BASE 600 µm y 6 mm BASE 800 µm)
	 CW (clockwise/optical area of 5) CW6 (clockwise/optical area of 6) CCW (counterclockwise/optical area of 5) CCW6 (counterclockwise/optical area of 6)	 ENDO-K PRO EQP75 EQP80 EQP85 EQP90

Vacuum system
Medical device designed to stabilize the cornea and facilitate the tunneling process during the intracorneal rings implantation surgery.

CATARACT

Hydrophilic lens	Acrylic intraocular lenses	Rigid PMMA
 Y601075 INJECTABLE	 F601250 AIALA	 LLASY60 AS-IOL
 P651300 RIGIOL	 A601250 RIGIOL	
Capsulars Rings	Aspherical hydrophobic lens	
 RING AS	 LLASHP60 AIALA DRY	 LLASHP60-PL AIALA DRY PRELOADED
 RING ACS	 RING AS PL PRELOADED	 RING ACS PL PRELOADED
