Sphere diameter	12 mm	14 mm	16 mm	18 mm	19 mm	20 mm	21 mm	22 mm	23 mm	
Description and Indications	<p>OCULFIT SPHERICAL orbital implants are implants designed for orbital reconstruction following an evisceration or enucleation procedure.</p> <p>They are made from high-density polyethylene, which has been proven to be well tolerated by tissues and which provides stability, giving surgeons biocompatible porous materials for orbital reconstruction.</p> <p>The advantage of the structure of open, interconnected pores is that it enables vascularisation and the growth of soft tissue inside it. The anterior surface of Oculfit Orbital Implants is <b>smooth and porous with four shallow suturing tunnels in an aim to facilitate the attachment of the rectus muscles</b>. The smoother porous surface can help to minimise the exposure of the implants in the long term.</p>									
Material	High density porous polyethylene (HDPE).									
Sterilization method	Ethylene Oxide (ETO).									
Supply	Sterile, single container. The devices are accompanied by an insertion accessory that facilitates their implantation, avoiding the adhesion of the tissues in its path.									
Shelf-life	5 years									

THE PERFORATED CONFORMER IS RECOMMENDED TO BE PLACED IMMEDIATELY AFTER THE SURGICAL PROCEDURE.

Brand name	AJL PERFORATED CONFORMER		
References	CF-S-AJL	CF-M-AJL	CF-L-AJL
Size	Small: 22 x 19	Medium: 24 x 21	Large: 25 x 22

Brand name	ORBITAL VOLUME SIZER SET
Reference	F6-SS
Size	14 mm, 16 mm, 18 mm, 20 mm, 22 mm.
